ACCLARENT® SE Inflation Device

This inflation device is intended to inflate, deflate and monitor pressure in sinus balloon catheters. Designed for ease-of-use, this device is a convenient tool to use during balloon sinuplasty procedures.

Warnings and Precautions
- Intended for single patient use only. DO NOT REUSE.
- After use, the Inflation Device may be a potential biohazard. Handle and dispose of in accordance with accepted hospital procedures.
- Do not use a device where the integrity of the sterile packaging has been compromised or if the device appears damaged.
- Do not exceed the recommended maximum inflation pressure of the balloon catheter being used.
- Do not use air or a gas medium to inflate the balloon.
- Not compatible with INSPIRA Air® Balloon Dilation System.

ACCLARENT® SE Inflation Device Quick Start Guide

Step 1: Prepare
Place the end of the inflation tubing into sterile solution.

Step 2: Fill
A. Press and pull back on the knob to draw fluid.
B. Hold the device upright and push the knob in to remove excess air.
C. Pull back on the knob until the black fill line aligns with the black triangle fill markers, then release.

Note: Rotating the knob counterclockwise will decrease the pressure.

Step 3: Connect

Step 4: Inflate
Rotate the knob clockwise to fill the balloon until target pressure is achieved.

Step 5: Deflate
Press and hold, then pull the knob back until the black fill line aligns with the blue vacuum lines, then release.
(can be done any time during the procedure)

Note: Rotating the knob counterclockwise will decrease the pressure.
